

Because of **YOU**

July - September 2026

Inside:

How your compassion is supporting a long road to recovery.

You've helped heal a mother's broken heart.

Because of you, communities are not forgotten.

Because of you,

**hope is being rebuilt
in the wake of the
Nepal floods...**

When devastating flash floods tore through Nepal, families lost everything. For survivors with disabilities, the disaster was catastrophic, homes vanished and life-saving mobility equipment was swept away in an instant.

But thanks to your rapid support, CBM did not let them navigate this darkness alone. Because of you, our teams on the ground delivered immediate impact:

Restored Independence: We quickly distributed vital crutches and walkers to those who lost their mobility.

Trauma Care: Psychosocial counsellors deployed directly to hard-hit areas to help grieving families heal.

Your generosity funds safe spaces and mental health counselling, helping displaced families restore their dignity and wellbeing.

Because of you, children are receiving critical psychosocial support to process trauma and express grief through art.

Inclusive Relief: Dedicated Disability Desks ensured emergency food, water, and medical aid reached the most vulnerable.

In times of tragedy, your compassion injects a vital spark of faith into the hearts of the Nepalese people, assuring them **they are not forgotten.**

Thanks to you, families are receiving dignified aid as they take their very first steps towards rebuilding their lives. Thank you for your continued faith.

Because of you,

**Chepe and Urmila
feel empowered...**

Do you remember Chepe and her daughter Urmila? Chepe can't hear and Urmila can't walk, so when a flash flood devastated their rural village, they were left to face it alone. That was until YOU came along!

Your faithful support is putting systems in places to prioritise the needs of people with disabilities when disaster strikes. Your caring heart is making communities safer and better prepared through disaster drills and early warning systems.

And your support doesn't stop there, reaching even more of those in need in Madagascar...

Because of you...

communities are not forgotten

When Cyclone Gezani struck eastern Madagascar, families lost their homes, crops, and livelihoods. For people with disabilities, the disaster brought catastrophic barriers to emergency information, services, and support.

But thanks to your generosity, CBM and local partners are building a safer, more inclusive future. Working alongside communities, we are identifying hidden barriers and ensuring emergency planning includes everyone.

Reflecting on this life-changing support, one impacted family with disability shared a powerful message:

“ For the first time since the cyclone, we felt that someone had thought about us. ”

Your faithful support ensures people with disabilities can access vital information and participate in community preparedness before, during, and after emergencies.

Thank you. You have created resilience in communities, where now no one is forgotten, and no one is left behind.

Sapana feels seen and heard, because of you

Your compassionate heart is easing Sapana's pain. Mental health is widely misunderstood in Nepal.

Instead of receiving support, Sapana was cast aside by her own family and separated from her children.

But YOU saw her!

Kind-hearted supporters like you provided the professional mental health counselling, diagnosis, and free medication she desperately needed.

When Sapana felt completely isolated, your faithful care gave her a lifeline. Today, she has the support to explain her condition to her loved ones, hoping they will welcome her back.

Because of you, she is one step closer to the life God intended for her. Thank you for caring for those in despair.
